Information Systems graduate (Expected February 2026) with technical expertise in full-stack development and predictive analytics. Experienced in the full software development life cycle (SDLC), including system analysis, database design, and data visualization. Primarily skilled in Python and JavaScript, with a focus on frameworks like Django and Tailwind CSS to deliver full-stack user experiences. I am proficient in Agile methodologies, having contributed to system design and functional testing within sprint-based environments to deliver real-world software solutions.

EDUCATION

Bachelor of Science in Information Systems

De La Salle-College of Saint Benilde | 2022-2026

Computer Engineering Coursework

University of the Philippines Diliman | 2007-2009

AWARDS AND ACHIEVEMENTS

Best Capstone Project Award – *MetroMetrics (Transit Analytics Platform)*, De La Salle-College of Saint Benilde

Consistent Dean's Lister Awardee (All Enrolled Terms) – School of Management and Information Technology

TECHNICAL SKILLS AND CERTIFICATIONS

- Languages: Python, JavaScript, HTML, CSS, C#, C++ (Arduino/IoT)
- Frameworks & Libraries: Django, Flask, Tailwind, Bootstrap, XGBoost, Pandas, NumPy
- Databases: MySQL, Firebase
- Tools & Platforms: Git, GitHub/GitLab, Docker, Linux, Grafana, Google Looker Studio

WORK EXPERIENCE

Software Engineer & System Analyst Intern (2025) – Globe Telecom, Inc., Taguig City

Contributed to software development and system analysis in agile sprints, supporting system design and documentation through requirements gathering, architecture diagramming, and functional testing. Worked with Google Cloud Platform and Grafana observability tools for logging and metrics on AI-based systems.

Actively integrated into an enterprise engineering team, contributing to the end-to-end SDLC, including documentation.

Selected Internship Projects:

- Developed an observability dashboard using a Grafana stack to monitor logging and metrics for an AI chatbot.
- Assisted in system design documentation for an eSIM project, including requirements analysis, architecture diagrams, and stakeholder inputs.

Owner, Operations Manager (2018–2020) – Project PC, Pasig City

Managed a small computer retail and CCTV installation business. Handled customized computer builds, resolved hardware/network issues, and managed client operations.

Gained hands-on experience with computer systems, troubleshooting, and technical support.

CAD Technician (2010–2014); Project Coordinator (2014–2018) – ABuild, Inc., Mandaluyong City

Drafted blueprints and technical layouts using AutoCAD to support architects and engineers. Coordinated pre-construction client communications for commercial projects. Represented the company in project biddings.

Gained hands-on experience in project coordination contributing to the successful execution of multiple high-stakes projects.

PROJECTS

MetroMetrics – Web-Based Transit Analytics Platform | Lead Developer

Awarded "Best Capstone Project". Built a forecasting platform for train passenger crowding using Django, XGBoost, and MySQL. Led a four-person team, implemented REST APIs, and embedded Google Looker dashboards for data visualization.

Demonstrated predictive analytics and software deployment in a real-world context.

ROMdle Helper – Flask Web App | Solo Project

Developed a word-based assistant tool using Python and Flask, featuring pattern-matching and wildcard logic. Integrated Google Sheets API as a real-time CMS, enabling community-driven database updates.

Showcased full-stack development and problem-solving through self-initiated software design.
