I am an entry-level software engineer with a background in computer hardware and business operations, currently completing a Bachelor of Science in Information Systems. Over the course of my studies and projects, I have gained experience in full-stack web development, database design, and predictive analytics. My technical skills include Python, JavaScript, and MySQL, and I have applied these in hands-on projects using Django, XGBoost, and data visualization tools. I work effectively in agile, collaborative teams and quickly adapt to new frameworks through self-directed learning. I am eager to contribute clean, maintainable code and build functional prototypes that deliver real-world value.

TECHNICAL SKILLS AND CERTIFICATIONS

- Languages: Python, JavaScript, HTML, CSS, C#, C++ (Arduino/IoT)
- Frameworks & Libraries: Django, Flask, Bootstrap, XGBoost, Pandas, NumPy
- Databases: MySQL, Firebase (foundational)
- Tools & Platforms: Git, GitHub, Docker, Postman, VS Code, PyCharm, Linux, Google Looker Studio
- Certifications: AWS Cloud Foundations (2023)

PROJECTS

MetroMetrics – Web-Based Transit Analytics Platform | *Lead Developer*

Built a forecasting platform for train passenger crowding using Django, XGBoost, and MySQL. Led a four-person team, implemented REST APIs, and embedded Google Looker dashboards for data visualization. Demonstrated predictive analytics and software deployment in a real-world context.

ROMdle Helper – Flask Web App | *Solo Project*

Developed a word-based assistant tool using Python and Flask with pattern-matching logic, wildcard support, and random word generation. Showcased full-stack development and problem-solving through self-initiated software design.

Barangay 756 Community Web Portal – Google Sites

Collaborated on a university-led community portal, organizing content and designing layouts to improve accessibility for local residents. Worked in Agile-Scrum sprints, presenting weekly outputs and iterating based on product owner feedback.

WORK EXPERIENCE

Owner, Operations Manager (2018–2020) – Project PC, Pasig City

Managed a small computer retail and CCTV installation business. Handled customized computer builds, resolved hardware/network issues, and managed client operations.

Gained hands-on experience with computer systems, troubleshooting, and technical support.

CAD Technician (2010–2014); Project Coordinator (2014–2018) – ABuild, Inc., Mandaluyong City

Drafted blueprints and technical layouts using AutoCAD to support architects and engineers. Coordinated pre-construction client communications for commercial projects. Represented the company in project biddings.

Gained hands-on experience in project coordination contributing to the successful execution of multiple high-stakes projects.

EDUCATION

Bachelor of Science in Information Systems

De La Salle–College of Saint Benilde | Expected 2026

Computer Engineering Coursework

University of the Philippines Diliman | 2007-2009

AWARDS AND ACHIEVEMENTS

School of Management and Information Technology Consistent Dean's Lister Awardee – De La Salle–College of Saint Benilde

Received plaques for 3 consecutive Dean's List terms in both AY 2022–2023 and AY 2023–2024
